## Additional Projects & Work

- Developer of **Viris**, an AI personal assistant built with voice interaction
- Developer of **Hush Bot**, a Discord-based AI and utility bot

## Projects

### Hush Chat – Discord-inspired Real Time Chat app

 <https://chat.codehush.com>

A fully custom-built chat platform inspired by Discord's UI and UX (created for learning, not as a commercial clone).

**Tech:** React, Tailwind, JavaScript, custom UI components

#### Highlights:

- Built a polished multi-panel UI like modern chat applications
- Designed responsive layouts and interactive components
- Implemented dynamic routing and reusable UI structures
- Focus on design accuracy, animations, and user flow

### Portfolio Website – Modern 3D Developer Portfolio

 <https://omar.codehush.com>

A personal portfolio designed with speed, animation, and modern styling in mind.

**Tech:** Vite, React, Tailwind, Three.js

#### Highlights:

- Custom 3D visual elements using Three.js
- Fully responsive design
- Interactive sections and animations
- Fast-loading architecture using Vite

### Minecraft Server Website (Freelance Work)

 Live, client-facing project

Built and maintained a fully operational website for a Minecraft gaming server.

**Tech:** HTML, CSS, PHP, MySQL

#### Highlights:

- Designed landing pages, store pages, and player-related UI
- Set up backend logic for forms and content updates
- Managed hosting, deployment, and ongoing updates
- Worked directly with clients to implement new features
